Detailed Action

The amendment filed on 2-4-2005 has been entered. Upon further consideration, the allowable subject matter of claim 22 as indicated in the previous Office action has been withdrawn. Any inconvenience to the Applicant is regretted.

Claim Rejection - 35 U.S.C. 112, second paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 23, line 3, "said other" has no clear antecedent basis.

Claim Rejection - 35 U.S.C. 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Wetzel et al. (U.S. Patent No. 6,052,904).

Wetzel et al. show a linkage mechanism (see Figs.26a-26c) comprising a first and second spaced support arms (71,72) for pivotally connecting to a head (RK) of a hair removal appliance at a first and second pivot axes (see Fig.26a); a first common link member (74) for pivotably mounting to an appliance body (see column 9, lines 30-32) for rotation about a third axis (78) and being pivotably attached to each of the support arms (71,72) at fourth and fifth pivot axes (see Fig.26a); and at least one stabilizing link member (73) for pivotably mounting on the body at a first end thereof (77) and being pivotably attached at a second end thereof (see Fig.26a) to a single one (71) of the first and second support arms (71,72) at a sixth pivot axis (see Fig.26a) as claimed.

It is to be clarified, in Wetzel et al., the at least one stabilizing link member (73) has three extreme ends. One of its ends is pivotably attached to the body at a pivot point (77), a second end is pivotably attached to the first support arm (71), and a third end is pivotably attached to the second support arm (72) as shown in Fig.26. Since the second end of the stabilizing link member (73) is pivotally attached to the first support arm (71) only, it is fair to say the second end is pivotably attached to a single one of the first and second support arms (71,72) as claimed.

Indication of Allowable Subject Matter

1. Claims 1-21 and 24-27 are allowed.

Claims 1 and 27 contain allowable subject matter because none of the prior art of record taken alone or in combination thereof shows or fairly suggests the claimed linkage mechanism.

The most relevant reference is to Wetzel et al (U.S. Patent No. 6,052,904) in which Figs. 27-29 show a linkage mechanism comprising a pair of spaced support arms (71,72) pivotably attached to a head (RK) at a first and second pivot axes (154,155), the first and second pivot axes (154,155) being spaced apart by a first distance; a first transverse link member (74) pivotably mounted on the body (see column 9, lines 56-58) for rotation about a third axis (78) and being pivotably attached to each of the support arms (71,72) at fourth and fifth pivot axes (152,153) spaced apart by a second distance. However, the second distance is equal to the first distance rather than less than the first distance as required by the claims. Further, one (79) of the second and third transverse link members (73,79) is pivotally mounted on the head (RK) rather than on the body as required by the claims.

2. Claim 23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
